## Applied Economics Exercises: Exercise 3

Name $\qquad$ Class $\qquad$ Date $\qquad$

You are in charge of hiring a new general employee for your egg farm and the starting wage is $\$ 22,000$ per year. You also pay an additional \$2,000 to cover benefits.
A. How many eggs, at $\$ 0.07$ per egg, would have to be produced to pay the employee and their benefits?
B. If your hens lay an average of 265 eggs per year per hen, how many hens would you have to have to pay the employee?
C. How much does the employee make per hour?
